DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-23 in the reply filed on 4/5/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, claims 24-26 are not further treated on the merit.

Claim Objections

2. The recitation of "the data digital" recited at line 4 is suggested to changed to -- the digital data --.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of claim 7 is vague and indefinite because it is unclear of whether the claim is a method or apparatus claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Mohan et al (US 6,775,324).

Regarding claims 1-4, 6, 12-15, 17, Mohan, as shown in figure 7, teaches a method and apparatus for RF transmitting of digital data comprising abrupt phase shift keying the digital data (200, 710) and bandpass filtering the digital data (720). See also column 4, line 55 to column 5, line 9; column 5, line 50 to column 6, line 23; and column 7, line 20 to column 9, line 7.

Regarding claims 5 and 16, Mohan further teaches the digital data in NRZ format. See column 5, lines 10-19.

Regarding claims 7-11 and 18-23, Mohan further teaches a corresponding method and apparatus for receiving the transmitted signal. See figure 8 and column 6, line 55 to column 9, line 7.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Wong (US 5,027,372) and Walker (US 5,185,765) are cited because they are pertinent to PSK modulator and demodulator.
